## Arabidopsis - Wikipedia

Arabidopsis (rockcress) is a genus in the family Brassicaceae. They are small flowering plants related to cabbage and mustard. This genus is of great interest since it contains thale cress (*Arabidopsis thaliana*), one of the model organisms used for studying plant biology and the first plant to have its entire genome sequenced. bio0202.Members of the Multinational Arabidopsis Steering ...

Arabidopsis: The Model Plant. *Arabidopsis thaliana* is a small dicotyledonous species, a member of the Brassicaceae or mustard family. Although closely related to such economically important crop plants as turnip, cabbage, broccoli, and canola, *Arabidopsis* is not an economically important plant.
