[Ball Turning Attachment for the ML7 Lathe - Steve's workshop](#)

The ball turning tool was used to form part of a handle for a fire poker, which was being made as a present. The poker handle was formed from a piece of 1" diameter brass rod, because of the clearance required by the ball cutting tool to create a sphere the ball was made separately and pinned and brazed onto the end of the handle.

[Ball turner - mikesworkshop](#)

Sieg produce a ball turner for the minilathe. Their version swings around the workpiece in the vertical plane. The problem with ball turners that operate in the vertical plane is that unless the workpiece is a long way out from the chuck there is an inevitable conflict with the chuck itself. A ball turning attachment is really just a mechanism that cause the cutting edge to follow a circular path which is the outside of the ball being cut. There are two different ways this can be done. The cutting edge can turn in the horizontal plane or it can turn in a vertical plane lying along the axis of the lathe.
