Besides skin cancer, breast cancer is the most commonly

diagnosed cancer among American women. In 2019, it's estimated that about 30% of newly diagnosed cancers in women will be breast cancers. In women under 45, breast cancer is more common in African-American women than white women. Overall, African-American women are more likely to die of breast cancer. For Asian, Hispanic, and Native-American women, the risk of developing and dying from breast cancer is lower.

Breast Cancer in Sub-Saharan Africa: Opportunities for ...

Breast cancer is a growing health problem in sub-Saharan Africa [1, 2], with it now having surpassed cervical cancer as the leading cause of death in many countries. Some of the increased occurrence likely reflects that women are living longer and adopting lifestyles that favor higher incidence rates (e.g., delays in childbearing, decreased total fertility, more obesity) [4].

Breast Cancer Risk in American Women - National Cancer ...

Women who have a high percentage of breast tissue that appears dense on a mammogram have a higher risk of breast cancer than women of similar age who have little or no dense breast tissue. In general, younger women have denser breasts than older women. As a woman ages, the amount of glandular tissue normally decreases and the amount of fatty tissue increases. Abnormalities, such as tumors, in
