[What is business process reengineering \(BPR\)? -](#)

Definition ...

Business process reengineering (BPR) is an approach to change management in which the related tasks required to obtain a specific business outcome are radically redesigned. An important goal of BPR is to analyze workflows within and between enterprises in order to optimize end-to-end processes and eliminate tasks that do not provide the customer with value.

Management Tools - Business Process Reengineering - Bain ...

Business Process Reengineering involves the radical redesign of core business processes to achieve dramatic improvements in productivity, cycle times and quality. In Business Process Reengineering, companies start with a blank sheet of paper and rethink existing processes to deliver more value to the customer. They typically adopt a new value system that places increased emphasis on customer.

Business process reengineering - Wikipedia

Business process re-engineering (BPR) is a business management strategy, originally pioneered in the early 1990s, focusing on the analysis and design of workflows and business processes within an organization.
