## Cranioplasty - Wikipedia

Cranioplasty is a surgical repair of a defect or deformity of a skull. Cranioplasty is almost as ancient as trepanation. There is evidence that Incan and Muisca surgeons were performing cranioplasty using precious metals and gourds. **Cryostored autologous skull bone for cranioplasty? A study ...**

1. Introduction. Craniectomy is a life-saving procedure . . . Subsequent cranioplasty with autologous skull bone has a bone resorption rate from 4% to 22.8% , and an infection rate from 3.3% to 26% . . . There are concerns with their viability and the potential microbial contamination as they were explanted for a long period of time.
