## [Dementia Types | Symptoms, Diagnosis, Causes, Treatments](#)

Dementia is a general term for loss of memory and other mental abilities severe enough to interfere with daily life. It is caused by physical changes in the brain. Alzheimer's is the most common type of dementia, but there are many kinds.

### [Dementia - Wikipedia](#)

Frontotemporal dementias (FTDs) are characterized by drastic personality changes and language difficulties. In all FTDs, the person has a relatively early social withdrawal and early lack of insight into the disorder. Memory problems are not a main feature of this disorder.

### [Types of Dementia Explained - WebMD](#)

This is a combination of two types of dementia. The most common combination is Alzheimer's disease and vascular dementia. Frontotemporal Dementia (FTD) If your loved one has an FTD, he's developed

### [13 Types of Dementia, Symptoms, Causes, Stages & Treatment](#)

The types of dementia include Lewy body dementia, vascular dementia, and frontotemporal dementia. Other types include dementia associated with Parkinson's disease or Huntington's disease. Senile dementia (senility) is a term that was once used to describe all dementias; this term is no longer used as a diagnosis.

### [Types of Dementia - National Institute on Aging](#)

Alzheimer's disease is the most common type of dementia. Learn about other dementias, including Lewy body dementia, frontotemporal disorders, vascular dementia, and mixed dementia.

### [Dementias - definition of dementias by The Free Dictionary](#)

Loss of cognitive abilities, including memory, concentration, communication, planning, and abstract thinking, resulting from brain injury or from a disease such as Alzheimer's disease or Parkinson's disease.

### [What Is Dementia? - National Institute on Aging](#)

Other dementias include Lewy body dementia, frontotemporal disorders, and vascular dementia. It is common for people to have mixed dementia a combination of two or more types of dementia. For example, some people have both Alzheimer's disease and vascular dementia.

### [Dementia: Symptoms, treatments, and causes - Health News](#)

Dementia is a collective term used to describe various symptoms of cognitive decline, such as forgetfulness. It is

a symptom of several underlying diseases and brain disorders.

#### **Home - Dementia New Zealand**

Dementia New Zealand was founded in 2016 by three dementia service organisations: Dementia Auckland, Dementia Waikato and Dementia Canterbury. These were soon followed by Dementia Hawkes Bay, Dementia Lakes and Dementia Wellington. Together they service an area that covers over 70% of New Zealand's population.

#### **Dementia | Society | The Guardian**

Exclusive: Comprehensive analysis finds harm from head to toe, including dementia, heart and lung disease, fertility problems and reduced intelligence

#### **What Are the Different Types of Dementia? - Alzheimers.net**

Even trained physicians may have a trouble determining for certain which type of dementia a patient has, and some people experience multiple types of dementia concurrently, which is called mixed dementia. That said, newly acquired knowledge and technologies are allowing doctors to diagnose and distinguish different types of dementias better than ever before.

#### **Alzheimer Society of Canada**

The Alzheimer Society works nationwide to support Canadians affected by Alzheimer's disease and other dementias.
