The development of the coal is also dependent on channel stability and the development of contained clastic deposition.

Glaciofluvial Deposits - Vancouver Island University

Deposition from glacial meltwater Glaciofluvial sedimentation is generally similar to fluvial sedimentation, except where it is in contact with the ice. Another difference is that the water is generally colder and denser, and also more viscous, so particles behave differently.

Finally, glacial outflows can be highly seasonal, even more than fluvial flows in our wet-dry climate. And of
