General Histology 2. Histology definition is the study of the tissues of the body and how these tissues are arranged to constitute organs. The Greek root histo can be translated as either "tissue" or "web," both of which are appropriate because tissues are usually webs of interwoven filaments and fibers, both cellular and non-cellular, with

(PDF) Anatomicohistological Characteristics of the Tubular ...

Anatomicohistological Characteristics of the Tubular Genital Organs of the Female Woolly Monkey (*Lagothrix poeppigii*) Article (PDF Available) in American Journal of Primatology 74(11):1006-16

Evolution of respiratory physiology for extreme high ...

Therefore, the remainder of this thesis tested the general hypothesis that these traits have evolved in bar-headed geese. Total ventilation was higher in bar-headed geese than in low altitude waterfowl during severe environmental hypoxia. This was entirely due to larger tidal volumes, which should have further enhanced effective ventilation of

US6660487B2 - Treatment of autoimmune disease - Google Patents

The present invention features a novel combination therapy useful in the treatment of autoimmune disease that increases or maintains the number of functional cells of a predetermined type in a mammal by killing or inactivating autoimmune cells and re-educating the host immune system.

Technical Guide for Nervous System Sampling of the ...

For general toxicity studies, a technique was designed to consistently sample the most important neuroanatomic regions of the brain, spinal cord, and peripheral nerve of cynomolgus monkeys using a limited number of blocks and slides. Using the most rostral portion of the pons as a

landmark, the entire fixed brain was cut dorsoventrally into
