Transport infrastructure investments are seen to be a driver for economic growth by promoting access to economic markets. However, the causal mechanisms behind this are contested. This study examines the effect of transportation networks in China on long term regional growth, during the period of 1986-2005. This study addresses the average effect of access to transport infrastructure, and whether areas that have better

**Infrastructure and Growth - London School of Economics**

Infrastructure and Growth Infrastructure2 is a heterogeneous term, including physical structures of various types used by many industries as inputs to the production of goods and services (Chan et al., 2009). This description encompasses social infrastructure (such as schools and hospitals) and economic infrastructure (such as network utilities). The latter includes energy, water
