Keep from All Thoughtful Men: How U.S. Economists Won ...

Keep from All Thoughtful Men overturns much accepted historical dogma on how World War II strategy was planned and implemented. It is taken for granted that the Axis powers were defeated by an avalanche of munitions that poured forth from pitiless American factories.

Keep From All Thoughtful Men: How U.S. Economists Won ...

Keep from All Thoughtful Men is the first book that tells how revolutions in both statistics and finance changed forever the nature of war. While the book relates the overall story of how economics dictated war planning at the highest levels, more specifically it tells how three obscure economists came to have more influence on the conduct of World War II than the Joint Chiefs. Because military historians rarely understand economics and economic historians just as rarely involve themselves

**Keep from All Thoughtful Men: How U.S. Economists Won ...**

In Keep from All Thoughtful Men, Jim Lacey (Institute for Defense Analyses and Johns Hopkins University) analyzes a series of debates from 1940 to 1942 over American capacity to produce munitions for the approaching and then raging war. The book (which runs to just 136 pages of narrative plus 65 pages in eight appendices of primary materials) is a valuable addition to economic-history literatures on twentieth-century America, on World War II, and on modern warfare.
