## Lactation - Wikipedia

Lactation describes the secretion of milk from the mammary glands and the period of time that a mother lactates to feed her young. The process can occur with all post-pregnancy female mammals, although it predates mammals. In humans the process of feeding milk is also called breastfeeding or nursing.

Lactation | definition of lactation by Medical dictionary Lactation is the medical term for yielding of milk by the mammary glands which leads to breastfeeding. Human milk contains the ideal amount of nutrients for the infant, and provides important protection from diseases through the mother's natural defenses.

lactation | Physiology, Pregnancy, & Hormones | Britannica.com

Lactation: Lactation, secretion and yielding of milk by females after giving birth. The milk is produced by the mammary glands, which are contained within the breasts. Pituitary hormones play a central role in lactation. Learn more about the biology and mechanism of lactation.

Lactation | Definition of Lactation at Dictionary.com

Lactation definition, the secretion or formation of milk. See more.

## Erotic lactation - Wikipedia

Erotic lactation is sexual arousal by breastfeeding on a woman's breast. Depending on the context, the practice can also be referred to as adult suckling, adult nursing, and adult breastfeeding.

## Human Milk and Lactation: Background, Pathophysiology

This article reviews the development of the mammary gland (mammogenesis), the process through which the mammary gland develops the capacity to secrete milk (lactogenesis), the process of milk production (lactation), and the specific properties of human milk that make it unique and appropriate for human infants.
