LOW P FLOW Mass Flow Meters Controllers for low pressure

For the control of higher flow rates at very low differential pressures Bronkhorst has devised special control valves with pressure compensation bellows (types F-004AC/F-004AI/F-004BI). These control valves are piped on to the flow meter while the electronic PI-control function is an integral part of the flow meter.

Water Flow Vs Pressure Hunker

Water flow and pressure both are related to friction. As water moves through a pipe, friction will slow it to a certain degree, depending on the texture and diameter of the pipe. The smoother the pipe, the less friction there is and the faster water can move through the pipe, provided that the water pressure is sufficient.
