[Melatonin Receptors: Molecular Biology of a New Family of ...](#)

A family of high-affinity, G protein-coupled receptors for the pineal hormone melatonin has been cloned from vertebrates. These recombinant receptors exhibit similar affinity and pharmacological characteristics to each other and to endogenous receptors, as defined with the melatonin agonist 2-[125 I]iodomelatonin (125 I-Mel). [G Protein Coupled Receptor - an overview | ScienceDirect ...](#)

Justine E. Kennedy, Adriano Marchese, in Progress in Molecular Biology and Translational Science, 2015. Abstract. G protein-coupled receptor (GPCR)-promoted signaling mediates cellular responses to a variety of stimuli involved in diverse physiological processes.

[G Protein Coupled Receptors and Their Effectors ...](#) Many different mammalian cell-surface receptors are coupled to a trimeric signal-transducing G protein. As noted earlier, ligand binding to these receptors activates their associated G protein, which then activates an effector enzyme to generate an intracellular second messenger (see Figure 20-3a).
