Build A Fish - Sea Grant

build a fish OVERVIEW Students learn about fish anatomy and morphology and discover how the shapes of a fish's parts are related to how the fish functions.

Fish anatomy - Wikipedia

Fish anatomy is the study of the form or morphology of fishes. It can be contrasted with fish physiology, which is the study of how the component parts of fish function

together in the living fish. In practice, fish anatomy and fish physiology complement each other, the former dealing with the structure of a fish, its organs or component parts
