Inflammatory demyelinating diseases of the central nervous ...

Inflammatory demyelinating diseases (IDDs), sometimes called Idiopathic (IDDs) because the unknown etiology of some of them, and sometimes known as borderline forms of multiple sclerosis, is a collection of multiple sclerosis variants, sometimes considered different diseases, but considered by others to form a spectrum differing only in terms of chronicity, severity, and clinical course.

The Spectrum of Demyelinating Inflammatory Diseases of the ...

Abstract. Multiple sclerosis (MS) is, by far, the most common inflammatory demyelinating disease of the central nervous system (CNS), but it is not the only CNS inflammatory demyelinating disease and there is a broad spectrum of disorders with varied clinical course, imaging features, epidemiological characteristics, regional distribution of
