[Neuropsychology - Wikipedia](#)

Neuropsychology is the study of the structure and function of the brain as they relate to specific psychological processes and behaviours. It is both an experimental and clinical field of psychology that aims to understand how behavior and cognition are influenced by brain functioning and is concerned with the diagnosis and treatment.

[Neuropsychology Careers - CareersInPsychology.org](#)

What Is Neuropsychology? The human brain is arguably the most complicated and astonishing organs in the human body. It can even be called the master organ, since it regulates all of the other organs in the body.
