## RSA SecurID Hardware Tokens | Two Factor Authentication

RSA SecurID hardware tokens employ an authentication approach that combines time, the AES-128 algorithm and a unique identifier to strengthen cryptographic value. Established by the National Institute of Standards and Technology, the AES-128 algorithm was approved by the U.S. National Security Agency to protect classified information up to the level of secret.

## Identity and Access Management | RSA SecurID Suite

RSA SecurID Suite goes beyond traditional identity and access management, using identity insights, threat intelligence and business context to provide secure access to all of your users, across all of your applications, from the ground to the cloud.

## RSA SecurID (Token): Passcode & PIN Initialization / Setup ...

RSA SecurID is a two-factor authentication based on something you know (a Passcode or PIN) and something you have (an authenticator such as a keyfob or smartphone RSA application) - providing a much more reliable level of user authentication than only a password.

## RSA SecurID Token Record Decryption Guide

RSA SecurID Token Record Decryption Guide To ensure the security of your RSA SecurID authenticators (tokens), RSA encrypts the token records that come with your order. Before you can distribute tokens to users, you must decrypt the token records, obtain the

## RSA SecurID Software Token on the App Store

Protect your company's most sensitive networked information and data with RSA SecurID two-factor authentication. RSA SecurID two-factor authentication is based on something you have (a software token installed in the Token app) and something you know (an RSA SecurID PIN), providing a more reliable level of user authentication than reusable

## RSA SecurID Found a Token EMC

RSA SecurID tokens are used for computer security. Our clients depend on us to keep token data secure and

releasing any information about the client company would violate that trust. Similarly, RSA Security cannot contact the token's owner directly to report the lost token because our clients keep their own user information confidential.
