Scope of this Revision This revision of the specification
describes the testing to be applied to hardware based on
the Universal Serial Bus 3.0 Specification, revision 1.0.

5 Steps for Selecting the Right USB to Serial adapter

The serial driver chip is what is actually communicating
and providing the power signals for your device connected
to the USB to serial adapter. We recommend a brand name
driver chip from Exar, Maxim or NI because these are very
reliable and works well with the FTDI and Silabs
processor chips.

USB - Wikipedia

Universal Serial Bus (USB) is an industry standard that
establishes specifications for cables and connectors and
protocols for connection, communication and power
supply between computers, peripheral devices and other
computers. Released in 1996, the USB standard is
currently maintained by the USB Implementers Forum
(USB IF).
