do it yourself solar power.

#### Solar Panel Installation at The Home Depot

Solar panels also can be wired together to create a system, increasing the amount of solar energy collected and solar power produced. Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof in a region with long peak sunlight hours with the panels facing south (for homes in the Northern Hemisphere).

#### Planning a Home Solar Electric System | Department of Energy

PPAs allow consumers to host solar energy systems owned by solar companies and purchase back the electricity generated. This is a financial agreement where a developer arranges for the design, permitting, financing, and installation on a consumer's property at little to no upfront cost.
