Ultrafine particle - Wikipedia

Ultrafine particles (UFPs) are particulate matter of nanoscale size (less than 0.1 μm or 100 nm in diameter). Regulations do not exist for this size class of ambient air pollution particles, which are far smaller than the regulated PM 10 and PM 2.5 particle classes and are believed to have several more aggressive health implications than those

Particle Technology - Official Site

Particle Technology - Particle Testing & Manufacturing. As one of the UK's leading and most respected particle testing and manufacturing companies, Particle Technology operates at the forefront of product reliability, supplying and supporting customers all over the world.

Fine particle components and health a systematic review ...

Fine particle mass (PM 2.5) has been studied and reviewed extensively, and little doubt remains regarding the adverse health effects of both long- and short-term exposure. 2,8,11,24,33,34 However
