[Modelling the effects of trade-offs between long and short ...](#)

Fisheries management is typically a complex problem, from both an environmental and political perspective. The main source of conflict occurs between the need for stock conservation and the need for fishing community well-

being, which is typically measured by employment and income levels.

Multi-species RIM: a bio-economic model for the integrated ...

The multispecies model can be used to evaluate weed management scenarios for coexisting herbicide-resistant species by investigating the implications of different crop pasture rotational

Fisheries: Facts and Trends - WWF South Africa - MAFIADOC.COM

The economic performance of the global marine fishery is determined by the quantity of fish caught, the price of fish, harvesting costs, and the biological productivity of fisheries (The World Bank 2009).

PASTURE AND GRAZING MANAGEMENT FOR PARASITE CONTROL
