[tropical rainforest | Climate, Animals, & Facts ...](#)

Tropical rainforest, also spelled tropical rain forest, luxuriant forest found in wet tropical uplands and lowlands around the Equator. Tropical rainforests, which worldwide make up one of Earth's largest biomes (major life zones), are dominated by broad-leaved trees that form a dense upper canopy (layer of foliage) and contain a diverse array of vegetation and other life.

[Tropical rainforest - Wikipedia](#)

Tropical rainforests are rainforests that occur in areas of tropical rainforest climate in which there is no dry season— all months have an average precipitation of at least 60 mm and may also be referred to as lowland equatorial evergreen rainforest.

[tropical Rainforest - Blue Planet Biomes](#)

A tropical rain forest has more kinds of trees than any other area in the world. Scientists have counted about 100 to 300 species in one 2 1/2-acre (1-hectare) area in South America. Seventy percent of the plants in the rainforest are trees.

The tropical rain forest is one of the most vibrant biomes of the entire world.

[List of Tropical Forest Animals - Animal Website For Kids](#)

Tropical forests are found near the Earth's equator. There are two main types of tropical forest: the rainforest and the seasonal forest. Both get more than 8.5 feet of rain every year. Seasonal forests have a wet season and a dry season. However, in the rainforest there isn't a dry season. In a tropical rainforest it rains regularly throughout the year.

Tropical rain forests are being converted to agricultural and ranch land, with associated erosion and disruptions of nutrient and water cycling. The preservation and sustainability of tropical forests is a complex social and political problem, but basic scientific principles and understanding needs to be used in management decisions.

Another biome similar to the tropical rain forest is the

cloud forest. These forests form on mountaintops in the tropics; I have been to such forests in Jamaica and Costa Rica, and they exist in other mountainous areas as well.

Tropical Rainforest - Internet Geography

The Tropical Rainforest is a forest occurring in tropical areas of heavy rainfall. It is abundant with many species of wildlife and vegetation. Rainforests cover less than two percent of the Earth's surface. They are home to some 50 to 70 percent of all life forms on our planet. Rainforests are the most productive and most complex ecosystems on Earth.
