Thyroid autoimmunity - PubMed Central (PMC)
Because the thyroid is enriched in thyroid-specific T and B cells, there was a recent period of interest in comparing the V gene repertoire of T cell receptors in thyroid tissue and peripheral blood from patients with autoimmune thyroid disease.

The Thyroid & Autoimmunity -- Healthololies
With autoimmune thyroid disease, the key to restoring proper function lies not just in managing the thyroid, but in managing the underlying autoimmune condition. Utilizing a unique to you combination of diet, lifestyle, supplementation and, if necessary, medication can reverse symptoms and help you regain your health.

Thyroid Autoimmunity
Thyroid hormones while antibodies against the TSH receptor do the same thing, so they compete with TSH on the cell surface. They bind more intensely than TSH and eventually lead to overstimulation of the thyroid cells which become enlarged and divide and produce more and more thyroxin and T3, leading to the symptoms of hyperthyroidism which include increased heart rate, anxiety, heat.

Autoimmune thyroiditis - Wikipedia
Autoimmune thyroiditis, is a chronic disease in which the body interprets the thyroid glands and its hormone products T3, T4 and TSH as threats, therefore producing special antibodies that target the thyroid's cells, thereby destroying it.
