This work assesses the issues facing biodiversity maintenance on tropical islands, and the impacts of biodiversity loss. These are one of the most threatened reservoirs of Earth's biodiversity and so merit special attention.

[Tropical Islands Biodiversity Crisis: The Indo-West ...](#)  
[Tropical Islands Biodiversity Crisis: The Indo-West Pacific assesses the issues facing biodiversity maintenance on tropical islands, and the impacts of biodiversity loss. The emphasis is on the Indo-West Pacific region, which includes many small islands where the biodiversity is under threat as a result of not only climate change and habitat destruction, but invasions by organisms previously Biodiversity and Climate Change Adaptation in Tropical Islands](#)

Tropical islands comprising small island developing states and small islands of continental countries located in the tropical region are very unique in terms of its biodiversity, resource endowments, climate and socio-economic profile. They are of four broad types namely, volcanic islands, atolls, near-atolls and reef islands, emergent limestone islands and continental fragments. In general they are smaller size, lie in isolation, face threat from climate change and sea-level rise and

...

The loss of biodiversity is important because human existence depends on the biological resources and it is the essential component of several ecosystems. The natural resources are over-exploited in many of the tropical islands in spite of fragile ecosystem to meet growing rural poverty and strive for economic growth. All these factors together with climate change are responsible for the extinction or threatened status of a number of species. In many of the tropical islands, loss of

### **Tropical Islands Biodiversity Crisis The Indo West Pacific ...**

tropical islands biodiversity crisis pdf Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science
