DESERT FEATURES - World Animal Foundation  
Sand covers only about 20 percent of the Earth's deserts. Most of the sand is in sand sheets and sand seas vast

regions of undulating dunes resembling ocean waves "frozen" in an instant of time.

#### **Features of a Desert DesertUSA**

Features of a Desert What Makes a Desert? Sand covers only about 20 percent of the Earth's deserts. Most of the sand is in sand sheets and sand seas--vast regions of undulating dunes resembling ocean waves "frozen" in an instant of time.

#### **Desert Features - USGS**

Deserts typically have a plant cover that is sparse but enormously diverse. The Sonoran Desert of the American Southwest has the most complex desert vegetation on Earth. The giant saguaro cacti provide nests for desert birds and serve as "trees" of the desert. Saguaro grow slowly but may live 200 years. When 9 years old, they are about 15 centimeters high. After about 75 years, the cacti are tall and develop their first branches. When fully grown, saguaro are 15 meters tall and weigh as much
